5. Chapter Resources: Multiple Choice Quiz

Grades:

Grades are determined by the sum of the three exam scores. Each exam consists of 30 multiple-choice questions and covers the preceding section of the course. The third exam will be given on the last day of classes rather than during the final exam week.

You will need (green) scantron form 882-E. You will receive a handout containing more information 2-3 weeks before the first exam.

You can earn 2 extra credit points for each exam by turning in a one-page report for each of 2 class experiments (or 1 extra credit point for 1 report) at the exam. There will be 3 class experiments during the lectures preceding each exam.

Your final grade will be based on the distribution shown below:
